

Feature of the Week- 08/03/09

Low Total Cost

iabol provides an economical total cost of ownership. What does that mean to you? It means there is no need to invest in new equipment. We hold your costs down by utilizing your current computer system, and support most label printers and scanners. There is no start up fee and we provide discounted third party insurance through U-PIC.

Since iabol is provided as Software-as-a-Service (SaaS) you will pay as you go with a monthly fee vs. the high costs of licensed applications. No hosting software and maintaining it with additional technical staff. Never pay for upgrades and only for what you use- iabol will dynamically adjust your monthly fee based upon your use. Remember, data importing, manifesting, reports, tracking, email delivery verification and technical support are all included in iabol's basic monthly fee.
